

32R

Photopolymer Plates

Totally Tack-Free Liquid Photopolymer Plate for Corrugated Printing

MacDermid's 32R photopolymer plates have a totally tack-free surface and high resilience which provides lint-free printing, excellent solids coverage, and easy clean up on press. The broad imaging latitude of 32R allows it to be used for high quality graphics printing as well as line work on corrugated.

For high quality, tack-free printing plates, count on the company that says "Yes We Can." MacDermid.

Key Features

- **Totally tack-free surface provides clean running on press**
- **High resilience produces excellent solids coverage and lint-free printing**
- **Can be capped for even finer details**

Technical Specifications

Hardness (Shore A)	32
Plate Thickness (in)	0.067-0.250
Background Thickness (in)	0.040-0.125
Relief Height (in)	0.025-0.125
Tone Range Reproduction.....	3-90%
Line Screen, lpi, max (capped)	100
Substrate Type.....	Type XN
Washout Chemistry.....	W6410-L
Color	Red

Segments

Corrugated
